

## FREE home energy survey

### What is it?

A trained volunteer can visit your home and advise on energy-saving ideas. See our friendly team below.

The visit lasts about one hour and we discuss:

- energy loss through the walls, roof, windows and floors;
- efficiency of your gas boiler;
- heating and hot water appliances and controls;
- lighting, cooking, laundry and water;
- damp, condensation and draughts;
- your fuel bills.

### What next?

A written report, with suggestions, is sent within two weeks. Plus information about grants and best buys. These can range from actions that are free to investments for the future.

### Who are we?

The surveys are carried out by Energy Alton. We do not represent any commercial or government interest. We are not selling anything.
